

GET_FILEEX_INFO_LEVELS enumeration

Defines values that are used with the [GetFileAttributesEx](#) and [GetFileAttributesTransacted](#) functions to specify the information level of the returned data.

Syntax

C++

```
typedef enum _GET_FILEEX_INFO_LEVELS {
    GetFileExInfoStandard,
    GetFileExMaxInfoLevel
} GET_FILEEX_INFO_LEVELS;
```

Constants

GetFileExInfoStandard

The [GetFileAttributesEx](#) or [GetFileAttributesTransacted](#) function retrieves a standard set of attribute information. The data is returned in a [WIN32_FILE_ATTRIBUTE_DATA](#) structure.

GetFileExMaxInfoLevel

One greater than the maximum value. Valid values for this enumeration will be less than this value.

Requirements

Minimum supported client	Windows XP [desktop apps Windows Store apps]
Minimum supported server	Windows Server 2003 [desktop apps Windows Store apps]
Header	WinBase.h (include Windows.h)
